Education

Queen's University, MSc. Evolutionary and Ecological Genetics 2018

Queen's University, B.Sc. (Hons) Biology 2016

Research Experience

Statistics and Bioinformatics

I have used R throughout my academic career and I am comfortable with generalized linear models, mixed models, and non-linear models. I am proficient in basic bioinformatics (filtering and preparing ddRADseq or whole genome data) and comfortable navigating and submitting jobs on a UNIX computer cluster. I have done basic programming in Python and have run non-linear and custom Bayesian models using STAN. I am happy and eager to learn and work with the best statistical software for any given analysis.

Fieldwork

I have spent three field seasons of working with numerous seabird species in Northern Alaska, Newfoundland, and in the Gulf of Alaska. I have worked with both small and large teams under difficult weather conditions to collect blood samples, make field observations, and capture and record morphometrics. I was in charge of the field team on Middleton Island for part of the 2019 field season. I have worked with teams in France to help maintain long-term data sets on great and blue tits near Montpellier and in Corsica.

Labwork

I am proficient in DNA extraction, PCR, microsatellite analysis, and preparing DNA samples for next-generation sequencing.

Awards

NSERC Michael Smith Foreign Study Supplement **$6,000CAD**

NSERC Alexander Graham Bell Canada Graduate Scholarship – Doctoral **$105,000CAD**

Haldane Prize Shortlist - Best Early Career Paper in Functional Ecology 2020

TD Fellowship in Arctic Environmental Issues 2019-2020 **$30,000CAD**

Northern Studies Training Program. Canadian Polar Commission. 2019. **$2,343CAD**

Northern Studies Training Program. Canadian Polar Commission. 2018. **$2,890CAD**

Society for the Study of Evolution Travel Grant. Society for the Study of Evolution.2018. **$500USD**

Northern Studies Training Program. Canadian Polar Commission. 2017. **$2,263CAD**

Canadian Society for the Study of Ecology and Evolution Travel Grant. 2016. **$750CAD**

Undergraduate Student Research Award. NSERC. 2016. **$4,500CAD**

North American Bluebird Society Grant. North American Bluebird Society. 2015. **$1,000USD**

Teaching Assistantships

I've helped to teach five biology courses at Queen's University. Topics included introductory genetics, evolutionary genetics, conservation biology, and evolutionary biology. I designed and taught a custom tutorial on quantitative genetics for an upper-year genetics course. I've helped co-supervise three honours thesis students at Queen's University on effective population size, phenotypic plasticity, and measuring selection in captivity.
