Drew Sauve

PhD Student
116 Barrie St Rm. 4441, Kingston, ON, Canada K7L 3N6
sauve.drew@gmail.com +1 613 929 5757 sites.google.com/view/sauve-drew | *Updated:* January 6, 2022

Education

Queen's University, MSc. Evolutionary and Ecological Genetics 2018

Queen's University, B.Sc. Biology 2016

Research Experience

Fieldwork

Three field seasons of working with numerous seabird species in Northern Alaska, Newfoundland, and in the Gulf of Alaska. Worked with both small and large teams under difficult weather conditions to collect blood samples, make field observations, and capture and record morphometrics. Directed a small team for targeted seabird sampling and specific data collection. Helped teach and guide undergraduates in the collection of seabird blood samples.

Labwork

Proficient in DNA extraction, polymerase chain reaction, microsatellite analysis, and preparing DNA samples for next-generation sequencing.

Statistics and Bioinformatics

Proficient in basic bioinformatics and comfortable with navigating and submitting jobs on a UNIX computer cluster. Proficient in programming in both Python and R. Comfortable with generalized linear models, mixed models, and non-linear models.

Awards

NSERC Alexander Graham Bell Canada Graduate Scholarship – Doctoral **$105,000CAD**

Haldane Prize Shortlist - Best Early Career Paper in Functional Ecology 2020

TD Fellowship in Arctic Environmental Issues 2019-2020 **$30,000CAD**

Northern Studies Training Program. Canadian Polar Commission. 2019. **$2343CAD**

Northern Studies Training Program. Canadian Polar Commission. 2018. **$2890CAD**

Society for the Study of Evolution Travel Grant. Society for the Study of Evolution.2018. **$500USD**

Northern Studies Training Program. Canadian Polar Commission. 2017. **$2263CAD**

Canadian Society for the Study of Ecology and Evolution Travel Grant. 2016. **$750CAD**

Undergraduate Student Research Award. NSERC. 2016. **$4,500CAD**

North American Bluebird Society Grant. North American Bluebird Society. 2015. **$1000USD**

Teaching Assistantships

I've helped to teach five biology courses at Queen's University. Topics included introductory genetics, evolutionary genetics, conservation biology, and evolutionary biology. I designed and taught a custom tutorial on quantitative genetics for an upper-year genetics course. I've helped co-supervise three honours thesis students at Queen's University on effective population size, phenotypic plasticity, and measuring selection in captivity.

Certifications

*Pleasure Craft Operator Card:*18032589508 2016

Canadian Firearms Safety Course 2016

Service

Volunteer Graduate Student Advisor for Creation of an Online Resource Library for Inclusive Science Communication 2021-2022

SciNapse Undergraduate Case Study Judge 2021-2022
